Celebrating a Legacy of Excellence at PIX TRANSMISSIONS LIMITED

A Journey of Growth, Grit, and Gratitude

As PIX Transmissions Limited marks its 44th Foundation Day, the occasion brings not only a celebration of milestones but a moment of reflection, appreciation, and renewed commitment.

What began in 1981 as a modest vision has grown into a globally respected name in the field of power transmission solutions, a transformation rooted deeply in trust, innovation, and the unwavering support of our extended PIX family.

From our very first belt to our most advanced technological breakthroughs today, the PIX journey has always been more than a business. It's a story of relationships, of belief, of passion, and relentless pursuit. Each achievement, no matter how big or small, stands as a testament to the dedication of our team members, the faith of our shareholders, the collaboration of their business partners, and the encouragement of their well-wishers.

Over four decades, PIX has expanded not only in scale but in spirit. With customers in over 100 countries and a state-of-the-art presence across manufacturing, R&D, and customer service, their reach may be global, but the values remain deeply

personal. Every handshake, every product, every partnership has been built on a foundation of integrity and excellence.

This anniversary is not just a celebration of PIX's past; it's a promise for the future. As they step into their 45th year, PIX is more committed than ever to driving innovation, embracing sustainability, and building stronger connections with those who have stood by them. The next chapter will be even more ambitious, a future shaped by advanced technologies, resilient teamwork, and a shared vision for collective success.

To every individual who has been part of their journey, whether as a colleague, a customer, a business partner, or a supporter, they extend our heartfelt gratitude. Your trust has been PIX's compass.

The company produces an extensive range of high-performance V-Belts, Timing Belts, and Poly-V Belts to suit a wide array of industrial, agricultural, automotive, and recreational applications. This IATF 16949-certified public limited company features state-of-the-art belt manufacturing units as well as an ultra-sophisticated, automated Rubber Mixing facility. The global credentials of PIX are evident in its operations in India, Europe, and the Middle East, in addition to over 250 committed Channel Partners in over 100 countries worldwide.

Here's to 44 years of excellence and many more years of shared success!
