New update

Drive design 4.0

As part of our continuous improvement objective and in response to your input on our existing Drive Design utility, we are delighted to announce the release of the **PIX Drive Design 4.0** tool. The PIX Drive Design 4.0 tool was developed to demonstrate the capabilities of PIX's most advanced products.

Key features of the **PIX Drive Design 4.0** utility include:

- Unit selection
- Timing belt selection based on shaft and pulley

- Belt section-wise length range update
- Multi pulley report updated with drive input

We kindly invite you to explore Drive Design 4.0 by clicking on the URL link: <http://dd.pixe-connect.com/> and feedback about your experience.

(For a better user experience, we recommend using the most recent versions of Chrome, Safari, Firefox, or Microsoft Edge)

If you should have any queries or if you need any assistance with this request, please don't hesitate to contact us anytime. We very much appreciate your business as well as feedback and will continue to strive to provide industry-leading products and services to meet your current and future needs. Do let us know if you have any suggestions to improve further.
